Contents

Volume 21 Number 1

Editorials

R. Huiskes — 1 — **Into the third decade**

R. Huiskes and R. A. Brand — 3 — **New editorial structure and procedures**

Papers

W. Herzog — 5 — **The relation between the resultant moments at a joint and the moments measured by an isokinetic dynamometer**

M. B. Schaffler and D. B. Burr — 13 — **Stiffness of compact bone: effects of porosity and density**

H.-U. Buff, L. C. Jones and D. S. Hungerford — 17 — **Experimental determination of forces transmitted through the patellofemoral joint**

M. Zamir and S. Phipps — 25 — **Network analysis of an arterial tree**

S. Kumar, D. B. Chaffin and M. Redfern — 35 — **Isometric and isokinetic back and arm lifting strengths: device and measurement**

F. E. Veldpaus, H. J. Woltring and L. J. M. G. Dortmans — 45 — **A least-squares algorithm for the equiform transformation from spatial marker co-ordinates**

H. Demiray — 55 — **Pulse velocities in initially stressed arteries**

J. C. Bean, D. B. Chaffin and A. B. Schultz — 59 — **Biomechanical model calculation of muscle contraction forces: a double linear programming method**

Letters to the Editor

T. C. Lam, N. G. Shrive and C. B. Frank — 67 — **Comment on 'The influence of specimen length on the tensile failure properties of tendon collagen'**

R. C. Haut — 67 — **Author's response**

P. R. Cavanagh — 69 — **On 'muscle action' vs 'muscle contraction'**

Book Review

Tin-Kan Hung — 71 — ***Life in Moving Fluids—The Physical Biology of Flow*, by S. Vogel**

Announcement 73 **Spinal Disorders 1988**

Erratum 75

Software Survey Section I

Volume 21 Number 2

D. N. Ghista, G. R. Viviani, K. Subbaraj, P. J. Lozada, T. M. Srinivasan and G. Barnes 77 **Biomechanical basis of optimal scoliosis surgical correction**

D. Gravel, C. L. Richards and M. Filion 89 **Influence of contractile tension development on dynamic strength measurements of the plantarflexors in man**

Cz. M. Rodkiewicz, S. Tokarzewski, J. S. Kennedy and J. Nielubowicz 97 **On the flow characteristics of the renal artery transplants—model studies**

A. M. Brant, S. S. Shah, V. G. J. Rodgers, J. Hoffmeister, I. M. Herman, R. L. Kormos and H. S. Borovetz 107 **Biomechanics of the arterial wall under simulated flow conditions**

T. D. Brown, D. R. Pedersen, E. L. Radin and R. M. Rose 115 **Global mechanical consequences of reduced cement/bone coupling rigidity in proximal femoral arthroplasty: a three-dimensional finite element analysis**

J. D. Currey 131 **The effect of porosity and mineral content on the Young's modulus of elasticity of compact bone**

P. Reuderink, P. Sipkema and N. Westerhof 141 **Influence of geometric taper on the derivation of the true propagation coefficient using a three point method**

J. C. Rice, S. C. Cowin and J. A. Bowman 155 **On the dependence of the elasticity and strength of cancellous bone on apparent density**

Technical Note

G. Bergmann, F. Graichen, J. Siraky, H. Jendrzynski and A. Rohlmann 169 **Multichannel strain gauge telemetry for orthopaedic implants**

Software Survey Section I

Volume 21 Number 3

R. B. Ashman and Jae Young Rho 177 **Elastic modulus of trabecular bone material**

E. J. van Zuylen, A. van Velzen and J. J. Denier van der Gon 183 **A biomechanical model for flexion torques of human arm muscles as a function of elbow angle**

G. S. Paddan and M. J. Griffin 191 **The transmission of translational seat vibration to the head—I. Vertical seat vibration**

G. S. Paddan and M. J. Griffin 199 **The transmission of translational seat vibration to the head—II. Horizontal seat vibration**

C. C. Danielsen and T. T. Andreassen 207 **Mechanical properties of rat tail tendon in relation to proximal–distal sampling position and age**

H. Oxlund, J. Manschot and A. Viidik 213 **The role of elastin in the mechanical properties of skin**

M. K. Patil and K. Subbaraj 219 **Finite element analysis of two dimensional steady flow in model arterial bifurcation**

J. M. Hasenkam, D. Westphal, H. Nygaard, H. Reul, M. Giersiepen and H. Stødkilde-Jørgensen 235 ***In vitro* stress measurements in the vicinity of six mechanical aortic valves using hot-film anemometry in steady flow**

M. F. Bobbert and G. J. van Ingen Schenau 249 **Coordination in vertical jumping**

S. Tsangaris and N. Stergiopulos 263 **The inverse Womersley problem for pulsatile flow in straight rigid tubes**

Books Received 267

Erratum 267

Announcements 268 **Biomechanics of Human Movement in Orthopaedics, Rehabilitation, Neuroscience and Sports**

268 **Twelfth Annual Meeting of the American Society of Biomechanics**

Software Survey Section I

Volume 21 Number 4

T. P. Harrigan, M. Jasty, R. W. Mann and W. H. Harris 269 **Limitations of the continuum assumption in cancellous bone**

K. J. Hutchison, E. Karpinski, J. D. Campbell and A. P. Potemkowski 277 **Aortic velocity contours at abdominal branches in anesthetized dogs**

B. B. Lieber and D. P. Giddens 287 **Apparent stresses in disturbed pulsatile flows**

G. S. Wunderly, M. L. Hull and S. Maxwell 299 **A second generation microcomputer controlled binding system for alpine skiing research**

T. R. Ackland, B. A. Blanksby and J. Bloomfield 319 **Inertial characteristics of adolescent male body segments**

S. M. McGill, N. Patt and R. W. Norman 329 **Measurement of the trunk musculature of active males using CT scan radiography; implications for force and moment generating capacity about the L4/L5 joint**

Books Received 343

Announcements 345 **Third European Conference on Research in Rehabilitation**

345 **Occupational Ergonomics**

345 **Sixth International Symposium on Biomechanics and Sport**

Software Survey Section I

Volume 21 Number 5

S. Mahanian and R. L. Piziali 347 **Finite element evaluation of the AIA shear specimen for bone**

R. L. Kirby, R. W. Marlow, D. A. MacLeod and A. E. Marble 357 **The effect of locomotion speed on the anterior tibial intramuscular pressure of normal humans**

D. A. Winter and S. E. Sienko 361 **Biomechanics of below-knee amputee gait**

H. Demiray, H. W. Weizsäcker, K. Pascale and H. A. Erbay 369 **A stress–strain relation for a rat abdominal aorta**

J. Newmiller, M. L. Hull and F. E. Zajac 375 **A mechanically decoupled two force component bicycle pedal dynamometer**

D. C. Viano and I. V. Lau 387 **A viscous tolerance criterion for soft tissue injury assessment**

C. Johnson and M. L. Hull 401 **Parameter identification of the human lower limb under dynamic, transient torsional loading**

J. C. Barbenel, P. Kenny and J. B. Davies 417 **Mouthpiece forces produced while playing the trumpet**

J. E. Smeathers and D. N. Joanes 425 **Dynamic compressive properties of human lumbar intervertebral joints: a comparison between fresh and thawed specimens**

H. M. Toussaint, G. de Groot, H. H. C. M. Savelberg, K. Vervoorn, A. P. Hollander and G. J. van Ingen Schenau 435 **Active drag related to velocity in male and female swimmers**

Technical Note

J. D. Currey 439 **The effects of drying and re-wetting on some mechanical properties of cortical bone**

Announcement 443 **First National Conference on Biomechanics**

Software Survey Section I **Grant Tracker™**

Volume 21 Number 6

R. W. de Boer, G. J. C. Ettema, H. van Gorkum, G. de Groot and G. J. van Ingen Schenau 445 **A geometrical model of speed skating the curves**

J. Isacson and L.-Å. Broström 451 **Gait in rheumatoid arthritis: an electrogoniometric investigation**

H. J. Buchner, M. J. Hines and H. Hemami 459 **A dynamic model for finger interphalangeal coordination**

D. J. Riemersma and J. L. M. A. Lammertink 469 **C libration of the mercury-in-silastic strain gauge in tendon load experiments**

H. W. Weizsacker and J. G. Pinto 477 **Isotropy and anisotropy of the arterial wall**

T. Yamaguchi, S. Kikkawa, K. Tanishita and M. Sugawara 489 **Spectrum analysis of turbulence in the canine ascending aorta measured with a hot-film anemometer**

A. R. Turner-Smith, J. D. Harris, G. R. Houghton and R. J. Jefferson 497 **A method for analysis of back shape in scoliosis**

Technical Notes

S. Y. C. To, M. K. Kwan and S. L.-Y. Woo 511 **Simultaneous measurements of strains on two surfaces of tendons and ligaments**

A. R. Turner-Smith 515 **A television/computer three-dimensional surface shape measurement system**

Announcement 531 **The Canadian Society for Biomechanics Fifth Biennial Conference on Biomechanics and Symposium on Human Locomotion**

Software Survey Section I

Volume 21 Number 7

H. Hatze 533 **High-precision three-dimensional photogrammetric calibration and object space reconstruction using a modified DLT-approach**

P. L. Weiss, I. W. Hunter and R. E. Kearney 539 **Human ankle joint stiffness over the full range of muscle activation levels**

E. P. M. Rousseau, A. A. van Steenhoven, J. D. Janssen and H. A. Huysmans 545 **A mechanical analysis of the closed Hancock heart valve prosthesis**

J. H. Koolstra, T. M. G. J. van Eijden, W. A. Weijs and M. Naeije 563 **A three-dimensional mathematical model of the human masticatory system predicting maximum possible bite forces**

B. Landjerit, B. Maton and G. Peres 577 ***In vivo* muscular force analysis during the isometric flexion on a monkey's elbow**

A. A. Prabhu and N. H. C. Hwang 585 **Dynamic analysis of flutter in disk type mechanical heart valve prostheses**

R. Romick-Allen and A. B. Schultz 591 **Biomechanics of reactions to impending falls**

C. P. Gibbons, E. A. Trowbridge, J. J. Bannister and N. W. Read 601 **The mechanics of the anal sphincter complex**

A. Rohlmann, E. J. Cheal, W. C. Hayes and G. Bergmann 605 **A nonlinear finite element analysis of interface conditions in porous coated hip endoprostheses**

Technical Note

K.-N. An, M. C. Jacobsen, L. J. Berglund and E. Y. S. Chao 613 **Application of a magnetic tracking device to kinesiologic studies**

Book Review

R. A. Brand 621 ***Electromyography for Experimentalists*, by G. E. Loeb and C. Gans (Eds)**

Software Survey Section I

Volume 21 Number 8

M. Fondrk, E. Bahniuk, D. T. Davy and C. Michaels	623	**Some viscoplastic characteristics of bovine and human cortical bone**
J. M. Hasenkam, H. Nygaard, M. Giersiepen, H. Reul and H. Stødkilde-Jørgensen	631	**Turbulent stress measurements downstream of six mechanical aortic valves in a pulsatile flow model**
J. M. Hasenkam, M. Giersiepen and H. Reul	647	**Three-dimensional visualization of velocity fields downstream of six mechanical aortic valves in a pulsatile flow model**
K. Perktold, H. Florian, D. Hilbert and R. Peter	663	**Wall shear stress distribution in the human carotid siphon during pulsatile flow**
V. K. Goel, C. R. Clark, K. Gallaes and Y. King Liu	673	**Moment–rotation relationships of the ligamentous occipito-atlanto-axial complex**
Technical Note		
D. Meglan, N. Berme and W. Zuelzer	681	**On the construction, circuitry and properties of liquid metal strain gages**
Letters To The Editor		
J. L. Williams	687	**Comment on the paper 'Response of a human head/neck/upper-torso replica to dynamic loading—II. Analytical/numerical model'**
Yih-Charng Deng and W. Goldsmith	687	**Reply to J. L. Williams' comments**
E. S. Grood, D. L. Butler and F. R. Noyes	688	**Comment on 'Effects of knee flexion angle on the structural properties of the rabbit femur–anterior cruciate ligament–tibia complex'**
S. L.-Y. Woo, J. M. Hollis and R. M. Lyon	689	**Authors' response**
C. W. McCutchen	691	**Comment on 'Experimental determination of the linear biphasic constitutive coefficients of human fetal proximal femoral chondroepiphysis'**
T. D. Brown and R. J. Singerman	691	**Authors' response**
P. Evans	692	**Comment on 'A biomechanical analysis of the talocalcaneal joint *in vitro*'**
J. R. Engsberg	692	**Author's response**
Books Received	693
